

INBRED MAIZE LINE PH907

Abstract

A novel inbred maize line designated PH907 and seed, plants and plant parts
5 thereof. Methods for producing a maize plant that comprise crossing inbred
maize line PH907 with another maize plant. Methods for producing a maize
plant containing in its genetic material one or more traits introgressed into PH907
through backcross conversion and/or transformation, and to the maize seed,
plant and plant part produced thereby. Hybrid maize seed, plant or plant part
10 produced by crossing the inbred line PH907 or an introgressed trait conversion
of PH907 with another maize line. Inbred maize lines derived from inbred maize
line PH907, methods for producing other inbred maize lines derived from inbred
maize line PH907 and the inbred maize lines and their parts derived by the use
of those methods.
